- **Chi-Square** – used to test for statistical significance. Answers the question, “Do we have a large enough sample to know our results are conclusive?”.
- **Heidke Skill Score** – used to test whether we are beating persistence or climatology.
- **Bias** – used to determine whether we are over-forecasting or under-forecasting.

Review

- HWD – **Overall we have declined slightly in skill but are still beating climatology.**

- TSTMS – Maintained moderate-high skill from last month, but continue to over forecast.
